## Education

**PhD** **University of Ostrava**, Biology — Ostrava, Czechia, 2015 – 2019
- Thesis: *Bridging the Americas and Eurasia: Population history of American arctic peoples*

**MSc** **Istanbul University**, Molecular Biology and Genetics — Istanbul, Türkiye, 2012 – 2015

**BSc** **Istanbul University**, Molecular Biology and Genetics — Istanbul, Türkiye, 2007 – 2012

## Experience

**Hacettepe University**, Assistant Professor, Department of Anthropology — Ankara, Türkiye, 2024 – present, 2 years

**Hacettepe University**, Instructor, Department of Anthropology — Ankara, Türkiye, 2019 – 2024, 5 years

**Max Planck Institute for the Science of Human History**, Visiting Researcher, Department of Archaeogenetics — Jena, Germany, 2018 – 2019, 1 year

**University of Ostrava**, Researcher, Life Science Research Center — Ostrava, Czechia, 2015 – 2019, 4 years

**Mustafa Kemal University**, Research Assistant, Department of Anthropology — Hatay, Türkiye, 2014 – 2015, 1 year

## Awards

**Science Academy Young Scientist Award (BAGEP)** — Bilim Akademisi, Türkiye, Apr 2025

The Science Academy's Young Scientist Award (BAGEP) is a highly prestigious, non-governmental recognition that supports early-career researchers across disciplines. Awarded through a rigorous, merit-based process, it provides recipients with independent funding and intellectual freedom to pursue original and high-risk, high-gain research. This trust-based model makes BAGEP a cornerstone of Turkey's scientific ecosystem.

## Grants and Projects

**From Bones to Bonds: Building the Genomic Basis for Roman Kinship Studies** — 2025 – 2027

**Principal Investigator** · TÜBİTAK 2247-B European Research Council (ERC) Support Program

**Investigation of Bronze Age Western Anatolian Population Dynamics with Archaeogenomic Approaches** 2024 – 2027
**Advisor** · TÜBİTAK 1001 Scientific and Technological Research Projects Funding Program

**Leprosy in Anatolia: A Palaeopathological and Archaeogenomic Study** 2023 – 2026
**Advisor** · TÜBİTAK 1001 Scientific and Technological Research Projects Funding Program

**Supplementary Funding for TÜBİTAK 1001 Project 121Z485** 2023 – 2025
**Principal Investigator** · Hacettepe University Scientific Research Projects Coordination Unit (BAP)

**Nicaean People and Byzantine Warriors: A Bioarchaeological Study (İBİS)** 2022 – 2025
**Researcher** · TÜBİTAK 1001 Scientific and Technological Research Projects Funding Program

**Anatolian–Caucasian Relations from the Neolithic to the Middle Ages: An Archaeogenomic Study on Human Remains from Anatolia and Azerbaijan** 2022 – 2025
**Advisor** · TÜBİTAK 1001 Scientific and Technological Research Projects Funding Program

**Investigation of the Population History of Roman Era Coastal and Inland Societies in Anatolia from an Archaeogenomic Perspective** 2021 – 2024
**Principal Investigator** · TÜBİTAK 1001 Scientific and Technological Research Projects Funding Program (Project No. 121Z485)

**Mapping the Neolithic Expansion in the Mediterranean: A Scientific Collective to Promote Archaeogenomics and Evolutionary Biology Research in Turkey (NEOMATRIX)** 2021 – 2024
**Researcher** · European Union Horizon 2020 Twinning

**Archaeogenomic Analysis of Genetic and Cultural Interactions in Neolithic Anatolian Societies (NEOGENE)** 2018 – 2024
**Researcher** · European Research Council (ERC) Consolidator Grant, Horizon 2020

**Archaeogenetic Study of Human Populations in Mainland Southeast Asia** 2019 – 2021
**Research Fellow** · University of Ostrava, Czechia

**New Research Directions at the Life Science Research Centre** 2015 – 2017
**Research Fellow** · University of Ostrava, Czechia

## Publications

**Zur Elektrodynamik bewegter Körper**
It concerned an interpretation of the Michelson–Morley experiment and the properties of light and time. Special relativity incorporates the principle that the speed of light is the same for all inertial observers regardless of the state of motion of the source.
Albert Einstein
en.wikisource.org/wiki/Translation:On_the_Electrodynamics_of_Moving_Bodies

**Über einen die Erzeugung und Verwandlung des Lichtes betreffenden heuristischen Gesichtspunkt**
In the second paper, he applied the quantum theory to light to explain the photoelectric effect. In particular, he used the idea of light quanta (photons) to explain experimental results, but stressed the importance of the experimental results. The importance of his work on the photoelectric effect earned him the Nobel Prize in Physics in 1921.
Albert Einstein
de.wikisource.org/wiki/%C3%9Cber_einen_die_Erzeugung_und_Verwandlung_des_Lichtes_betreffenden_heuristischen_Gesichtspur

**Die Grundlage der allgemeinen Relativitätstheorie**
The publication of the theory of general relativity made him internationally famous. He was professor of physics at the universities of Zurich (1909–1911) and Prague (1911–1912), before he returned to ETH Zurich (1912–1914).
Albert Einstein

## Skills

**Physics**

## Languages

**Turkish**
Native speaker

**English**
Fluent

## Interests

**Physics**

## Certificates

**Machine Learning** Jan 2018

**Quantum Computing** Jan 2018

**Quantum Information** Jan 2018

## Projects

**Quantum Computing** Jan 2018 – Jan 2018
Quantum computing is the use of quantum-mechanical phenomena such as superposition and entanglement to perform computation. Computers that perform quantum computations are known as quantum computers.

- Quantum Teleportation
- Quantum Cryptography
