N. Ezgi Altınışık

ezgialtinisik@hacettepe.edu.tr Ankara, Türkiye altinisik ezgimou

Education

University of Ostrava, Biology — Ostrava, Czechia, 2015 – 2016
- Bridging the Americas and Eurasia: Population history of American arctic peoples

Istanbul University, Molecular Biology and Genetics — Istanbul, Türkiye, 2012 – 2015

Istanbul University, Molecular Biology and Genetics — Istanbul, Türkiye, 2007 – 2012

Experience

Hacettepe University, Assistant Professor at Department of Anthropology — Ankara, Türkiye, 2024 – present, 2 years

Hacettepe University, Instructor at Department of Anthropology — Ankara, Türkiye, 2019 – 2024, 5 years

Max Planck Institute for Science of Human History, Visiting Researcher at Department of Archaeogenetics — Jena, Germany, 2018 – 2019, 1 year

University of Ostrava, Researcher at Life Science Research Center — Ostrava, Czechia, 2015 – 2019, 4 years

Mustafa Kemal University, Research Assistant at Department of Anthropology — Hatay, Türkiye, 2014 – 2015, 1 year

Awards

BAGEP 2025 — Apr 2025

The Science Academy's Young Scientist Award (BAGEP) is a highly prestigious, non-governmental recognition that supports early-career researchers across disciplines. Awarded through a rigorous, merit-based process, it provides recipients with independent funding and intellectual freedom to pursue original and high-risk, high-gain research. This trust-based model makes BAGEP a cornerstone of Turkey's scientific ecosystem.

Publications

Zur Elektrodynamik bewegter Körper

It concerned an interpretation of the Michelson–Morley experiment and the properties of light and time. Special relativity incorporates the principle that the speed of light is the same for all inertial observers regardless of the state of motion of the source.
Albert Einstein
en.wikisource.org/wiki/Translation:On_the_Electrodynamics_of_Moving_Bodies

Über einen die Erzeugung und Verwandlung des Lichtes betreffenden heuristischen Gesichtspunkt
In the second paper, he applied the quantum theory to light to explain the photoelectric effect. In particular, he used the idea of light quanta (photons) to explain experimental results, but stressed the importance of the experimental results. The importance of his work on the photoelectric effect earned him the Nobel Prize in Physics in 1921.

Die Grundlage der allgemeinen Relativitätstheorie
The publication of the theory of general relativity made him internationally famous. He was professor of physics at the universities of Zurich (1909–1911) and Prague (1911–1912), before he returned to ETH Zurich (1912–1914).

Machine Learning Jan 2018

Quantum Computing Jan 2018

Quantum Information Jan 2018

Projects

Quantum Computing Jan 2018 – Jan 2018
Quantum computing is the use of quantum-mechanical phenomena such as superposition and entanglement to perform computation. Computers that perform quantum computations are known as quantum computers.

- Quantum Teleportation
- Quantum Cryptography
